BMW began its life in aero-engineering--as anyone who's ever ridden one of its motorcycles might guess. These are bikes as close to airborne as any get. And what's more, fifty percent of all the motorcycles BMW has manufactured are still flying down the world's roads. These are the best, and in this book, the best of the best get their due, with brilliant, full-color photographs of BMW's classic models and detailed descriptions of their features, all located within the context of a concise history of this legendary marque. From the first of BMW's bikes, the R32, through the models that catapulted the company out of the ruins of World War II, to the latest bikes with the revamped opposed-twin-cylinder "boxer" engines that brought BMW its first fame--these are the bikes that

made history, and, better yet, gave the most demanding riders a taste for flight. A history of the Rudge-Whitworth cycle and motorcycle company, from the late 1800s to the 1940s, including full production histories of the motorcycle models. Topics covered include: the origins of Rudge-Whitworth, from Daniel Rudge's early bicycles, to the Pugh family merger; the expansion into motorcycle production in 1909, with the 'M' prototypes and 'F'-head engines; the invention of the Rudge Multi gear engine in 1912, and a subsequent Isle of Man win in 1914; the innovative 'Rudge Four' engines, with four parallel valves per cylinder; the 'Python' models - Rudge equipment used by other manufacturers, including in Enzo Ferrari's Scuderia Ferrari, and finally the post-war slump and a move to EMI, with later attempts to revive the Rudge name. With hundreds of original photographs, Rudge-Whitworth - The Complete Story is an ideal resource for anybody with an interest in the world's largest cycle and motorcycle manufacturers of the early twentieth century, with over two thousand machines still in existence, being enjoyed by their owners today. Superbly illustrated with nearly 200 original photographs (180

colour and 15 black & white). Includes, beginning Sept. 15, 1954 (and on the 15th of each month, Sept.-May) a special section: School library journal, ISSN 0000-0035, (called Junior libraries, 1954-May 1961). Also issued separately. Max Friz's R32 of 1923, the first BMW boxer twin motorcycle, set BMW on a path that would continue for the next 80 years. Although the twin has predominated, some of the most popular BMW motorcycles have been singles and the K-series triples and fours. BMW has never been afraid of innovation, from the supercharger of the 1920s and 1930s, the telescopic then Earles fork, wind-tunnel-developed fairings, anti-lock brakes and Paralever swingarms. Here is the full story of all the BMW road and racing machines, and the people who designed them, including classic machines such as the Kompressor, RS54, R69S, R90S, and R100RS, as well as the latest R1150 and K1200. Motorcycle Classic Book from Danny Liska who was cited in the Guinness Book of Motorcycling for this overland from Alaska to Argentina by motorcycle riding a 600 cc BMW R60. Danny is what most men want to be, an adventurer. Think of the most fantastic events that could happen to a man. Vampire bats sucked his blood, he has eaten monkey

and lizard to stay alive, traveled through a jungle with smugglers, suffered from malaria, doubled as a stunt man for Yul Brynner and ridden a motorcycle over 200,000 miles. Whether you're an easy rider or born to be wild, there is only one Harley-Davidson, and this is the book for you. "This book, a polished, winding meditation on the theory and fractiousness of motorcycles, celebrates both their

eccentric history and the wary pleasures of touring."—*The New Yorker* In a book that is "a must for anyone who has loved a motorcycle" (Oliver Sacks), Melissa Pierson captures in vivid, writerly prose the mysterious attractions of motorcycling. She sifts through myth and hyperbole: misrepresentations about danger, about the type of people who ride and why they do so. *The Perfect Vehicle* is not a mere recitation of facts, nor is it a polemic or apologia. Its vivid historical accounts—the beginnings of the machine, the often hidden tradition of women who ride, the tale of the defiant ones who taunt death on the racetrack—are intertwined with Pierson's own story, which, in itself, shows that although you may think you know what kind of person rides a motorcycle, you probably don't.

durable machines - including the R100S, fully-faired R100RS, four-cylinder K-series, high-performance R1100RS and an entire family of touring and sporting models ranging from 850 to 1200cc - would ensure the BMW boxer twins a place in the Haynes "Great Bikes" series. This book covers: historical context, racing, the wartime R75 and R69S; the "75" series which enabled BMW to compete with the high-performance Japanese machines; the R90S, the "76" and Superbike performance; the R100RS, the "77" and the touring R100RT; smaller twins, smaller potential; the R89G/S, including a Paris-Dakar version; rationalization of the boxer range, and the new twins that included four-valve heads and electronic engine management; and technical specifications from 1969 to 2003. Betty and Nancy Debenham were a pair of young adventurous lady motorcyclists who entered trials competitions on equal terms with men in the 1920's. Although they were serious motorcyclists they never let this get in the way of their tremendous sense of fun. Their spirit shines through in 'Motor Cycling for Women'. A practical and yet at times eccentric and quirky book from a bye-gone era that will make you smile. Fully updated

with the latest BMW motorcycles, this interactive book comes with an accompanying app with exciting features such as videos and additional photo galleries. The building of a vintage Indian Chief motorcycle is more than the restoration of a bike—it's the resurrection of a dream. Rebuilding the Indian chronicles one man's journey through the fearful expanse of midlife in a quest for peace, parts, and a happy second fatherhood. Fred Haefele was a writer who couldn't get his book published, an arborist whose precarious livelihood might just kill him, and an expectant father for the first time in over twenty years. He was in a rut, until he purchased a box of parts not so euphemistically referred to as a "basket case" and tackled the restoration of an Indian Chief motorcycle. With limited mechanical skills, one foot in the money pit, and a colorful cast of local experts, Haefele takes us down the rocky road of restoration to the headlong, heart-thrilling rush of open highway on his gleaming midnight-blue Millennium Flyer.
