Whether a CX500, luxurious CS650 Silver Wing, or CX650 Turbo, this book provides a step-by-step guide to a full restoration. From dismantling, sourcing and restoring parts, to spray painting, decals and polishing. From the rebuild itself, to general maintenance and riding safety, this is the only restoration manual you'll need. 186 pages, and more than 150 illustrations and charts, size 8.25 x 10.75 inches. This manual is a compilation of three original factory publications. The first is a reproduction of the 108 page 'Workshop Instruction Manual' for the 1957-64 Lightweight and Heavyweight singles and the twin cylinder models. The second is a reproduction of the 12 page 'Supplementary Instruction Book for Competition Models'. The third is a 60 page 'Instruction Book' combination that is exclusive to the 1958-1966 G2, G5, 14 and 8 Lightweight 250cc and 350cc singles. While the reprint of the original 108 page AMC workshop manual states that it is appropriate for the 1957-1964 models, it actually covers the entire line of AJS and Matchless 250cc to 650cc Lightweight and Heavyweight singles and 500cc to 650cc twins manufactured by AMC through 1966 (see below). Please note that it does not include the 750cc AMC G15/45 (1962-63) or the later Norton/AJS/ Matchless G15 hybrids. Owners of these 750cc hybrids are directed to the 'Norton 1966-70 Lightweight & Heavyweight Twins' workshop manual, ISBN 9781588502421 as it includes significant maintenance and repair information on those models. While the single cylinder machines are always considered the backbone of AMC's post-war production, in 1948 they introduced a 500cc twin cylinder, the AJS model 20 and Matchless G9. However, it was 1957 before that singular model was joined by a number of additional 500cc, 600cc and 650cc twins. In 1958 they also added two 'lightweight' singles to their well respected line of 'heavyweight' singles. Unfortunately, by the mid 1960's, along with most British motorcycle manufacturers, AMC was struggling to compete with the flood of Japanese imports and by 1966, the AMC conglomerate had collapsed. While the reason is mired in mergers, finances, consolidation, politics and worker unrest, both the AJS and Matchless name continued onward, under license, until early 1970, at which point both marques were history. 1957-1966 Lightweight and Heavyweight Singles and Twins covered in this manual are as follows: A.J.S. Models AJS 250cc Lightweight Singles: 14, 14CS, 14S, 14CSR AJS 350cc Lightweight Singles: 8 AJS 350cc Heavyweight Singles: 16MS, 16, 16C, 16MC, 16MCS, 16S AJS 500cc Heavyweight Singles: 18S, 18, 18CS AJS 500cc Twins: 20, 20CS, 20CSR (Also covers the earlier AJS 20 from 1948 onwards) AJS 600cc Twins: 30, 30CS (Also covers the 1955/56 AJS 30) AJS 650cc Twins: 31, 31CS, 31CSR, 650 Twin Matchless Models Matchless 250cc Lightweight Singles: G2, G2CS, G2S, G2CSR Matchless 350cc Lightweight Singles: G5 Matchless 350cc Heavyweight Singles: G3LS, G3, G3C, G3LCS, G3S Matchless 500cc Heavyweight Singles: G80S, G80, G80CS Matchless 600cc Heavyweight Single: TCS. Matchless 500cc Twins: G9, G9CS, G9CSR (Also covers the earlier Matchless G9 from 1948 onwards) Matchless 600cc Twins: G11, G11CS (Also covers the 1955/56 Matchless G11) Matchless 650cc Twins: G12, G12CS, G12CSR, 650 Twin Owners of the AJS Heavyweight singles may also find the following two publications useful: ISBN 9781588501240 'Book of the 1945-60' models and ISBN 9781588501677 'Book of the 1955-65' models. Similarly, owners of the Matchless Heavyweight singles are referred to ISBN 9781588502087 'Book of the 1945-1956' models and ISBN 9781588502056 'Book of the 1955-66 models. This publication is a reproduction of the Triumph factory workshop manual part number 99-0883/0889. The original 1963 through 1968 workshop manual, part number 99-0883, was subsequently updated with the addition of a 1969 through 1970 manual, part number 99-0889. Ultimately, both manuals were merged by the factory into a single combined manual, part number 99-0883/0889. This combination resulted in a comprehensive workshop manual for the entire line of UK and USA 650cc unit construction twins produced from 1963 through 1970. However, as this publication is a combination of two separate workshop manuals, some of the pages are duplicated. Fortunately, they occur sequentially and, while one will be for the earlier models, the other will apply to the later models and the reader is encouraged to exercise care in selecting the appropriate page from those duplications. Please understand that this is how the factory dealt with the minor differences within this manual. Unfortunately, the distinction between earlier and later models is not very well defined. For example, depending upon the model, the change from 6 to 12 volt electrics was spread over a 3-year period (1964-66). However, a fairly significant change

occurred in 1968 with the introduction of Amal Concentric carburetors and a twin leading shoe front brake. Therefore, 1968 is often incorrectly regarded as a demarcation point between early and late models but, unfortunately, it is not totally accurate. There were a number of 'running changes' made throughout the 8-year production run of these models and the way the factory identifies the point where those changes took place is by referencing engine numbers within each individual section of this manual. Consequently, it is important to note, with regard to any maintenance and repair instructions and also the specifications in the 'General Data' (GD) section, that wherever engine numbers are stated, the data will be specific to that particular series. Therefore, the reader is encouraged to read the entire section prior to commencing any work, paying close attention to the engine number sub-sections. Owners of the 650cc machines are subjected to considerable confusion surrounding the appropriate selection of the multitude of originals and reprints of the various 650cc manuals that have recently flooded the marketplace. However, the combination manual 99-0883/0889 is the most comprehensive manual for the entire line of UK and USA 650cc Unit Construction twins produced from 1963 through 1970 and covers all DU101 through DU90282 plus the later 1969 through 1970 alpha numeric series engines, however, it is somewhat scarce and difficult to find. In addition, many of the changes made during the production run would necessitate the use of both the individual manuals. However, those changes are combined in their entirety in the 99-0883/0889 manual and we are pleased to offer this reprint as a service to all 650cc Unit Construction owners. The years and models covered are: Thunderbird: 6T 1963-1966 Trophy: TR6 1963-1970 / TR6R1966-1970 / TR6C 1966-1967 Bonneville: T120 1963-1970 / T120R 1963-1970 / T120C 1963-1965 / Thrupton 1965 / TT 1964-1967 130 pages, 141 illustrations, size 7.5 x 9.25 inches.
