"A master source of symphonic and operatic excerpts from the works of the great composers, selected from the repertoire most frequently used for recitals, placement exams and professional auditions. The author provides comments on many of the selections which point out particular difficulties of the pieces, such as awkward transpositions, rhythms or fingerings. Where necessary to the understanding of the excerpt, some passages include second, third or fourth horn parts." Classical Sheet Music For French Horn With French Horn &

sometime before 1800, pursued a career as a horn player at least until 1832, and composed two sets of horn etudes which includes this set of 60 etudes, Op. 6. Most of the etudes focus on technical problems relating to the high range of the Horn. This book has been compiled to aid teachers and students in the development of the French Horn embouchure, particularly in the important period following elementary development. It is based upon the theory that, mechanically, nearly all of the problems to be met by the player in the orchestra, band, chamber ensemble, etc., can be covered by a comprehensive daily routine of practice. Various drills have been devised, with no claim to originality, to cope with the various mechanical problems of embouchure with which the player is faced in the field.

teachers can use this book as a teaching aid with new students. Beginners can use this if they want to have a go themselves. My name is Michael Shaw, I hope you find this book useful, Good luck with your music. One of the most widely used series of methods for individual or like-instrument class instruction. Using a very well-rounded approach including scales, arpeggios, technical studies, studies for musicianship, articulation studies, solos, duets, and studies devoted to the special needs of each instrument, this series provides a fantastic wealth of material for all student musicians. Abracadabra French Horn leads the learner from the earliest stages to competence, introducing the basic range of the instrument. The best way to learn through songs and tunes! First to be published in the series was *The Art of French Horn Playing* by Philip Farkas, now Distinguished Professor Emeritus of Music at Indiana University. In 1956, when Summy-Birchard published Farkas's book, he was a solo horn player for the Chicago Symphony and had held similar positions with other orchestras, including the Boston Symphony, Cleveland Orchestra, and Kansas City Conservatory, DePaul University, Northwestern University, and Roosevelt University in Chicago. *The Art of French Horn Playing* set the pattern, and other books in the series soon followed, offering help to students in learning to master their instruments and achieve their goals. *Legato Etudes for French Horn*, based on the vocalises of Giuseppe Concone, is addressed to three specific problems faced by the French horn performer: interpretation of the legato phrase, extension of the low range, and familiarity with the bass (F) clef. Key signatures, time signatures, and dynamic markings have received careful consideration in relation to these problems. Horn solo part: *Morceau de Concert op.94* by Camille Saint-Saëns, arranged for French Horn and Piano by Angelo Piazzini. Piano part available in series. The Second Book of Practical Studies is designed to logically extend the techniques already presented in the First Book and also to introduce and develop new techniques and rhythms that will offer a challenge to the intermediate student. Through the use of slightly more difficult and more extended studies, it is hoped that the material included in this book may more fully develop general musicianship and more feeling for style and interpretation and thus act as a foundation for solo literature.
