"The classification of this book is in our opinion an excellent one showing great industry and intelligence in the author, probing far into the minute subdivision of knowledge. Every librarian, no matter to what system he is pledged, will find it of the greatest advantage to keep Mr. Brown's work beside him for frequent consultation. A huge quantity of that miscellaneous information for which the librarian not seldom... delves anxiously in gazetteer, or dictionary, or elsewhere, is here ready for use. No one who is committed to the Dewey classification and notation need in our opinion change to this one and (perhaps through prejudice!) the Dewey classification plus the Dewey notation seems to us a more potent instrument for dealing with large libraries, but the Brown classification and the Brown notation show in several important points superiority to Dewey." -Review by E. A. Savage, Library World. * * * * With the advance of the open access the time has arrived when libraries should adopt a uniform classification scheme. The two systems now in general use are the Dewey decimal classification and the Cutter expansive classification. James Duff Brown issues this season a new scheme with a novel series of tables enabling subjects to be subdivided to any extent. "The scheme is so arranged that it can be applied to the largest library or the small collection." The Dewey system is in more universal use than the Cutter, but it is badly in need of revision. Mr. Dewey is at work on the new edition. He believes it would be foolish to re-east the classification "In view of the amount of cataloging that has been done by the present scheme." European as well as American librarians are being consulted in order to make the classification suitable for international use. The Cutter system "is distinguished as being the most logical and modern in its nomenclature of the recent systems. ... It is coming into use in a good many American libraries, and when the final expansion is finished and provided with an index will undoubtedly be more used still." It is urged upon the Library association to evolve a scheme worthy of universal adoption. --Library Work, Vol. 1

The Springer Handbook of Auditory Research presents a series of comprehensive and synthetic reviews of the fundamental topics in modern auditory research. It is aimed at all individuals with interests in hearing research including advanced graduate students, postdoctoral researchers, and clinical investigators. The volumes will introduce new investigators to important aspects of hearing science and will help established investigators to better understand the fundamental theories and data in fields of hearing that they may not normally follow closely. Each volume is intended to present a particular topic comprehensively, and each chapter will serve as a synthetic overview and guide to the literature. As such, the chapters present neither exhaustive data reviews nor original research that has not yet appeared in peer-reviewed journals. The series focusses on topics that have developed a solid data and conceptual foundation rather than on those for which a literature is only beginning to develop. New research areas will be covered on a timely basis in the series as they begin to mature. Are you the type of rock fan that isn't satisfied with simply listening to the radio? Two formidable men collide in this "first-class legal thriller" and New York Times bestseller about a celebrated criminal defense lawyer and the prosecution of his lifelong friend -- a doctor accused of murder (David Baldacci). At eighty-five years old, Alejandro "Sandy" Stern, a brilliant defense lawyer with his health failing but spirit intact, is on the brink of retirement. But when his old friend Dr. Kiril Pafko, a former Nobel Prize winner in Medicine, is faced with charges of insider trading, fraud, and murder, his entire life's work is put in jeopardy, and Stern decides to take on one last trial. In a case that will be the defining coda to both men's accomplished lives, Stern probes beneath the surface of his friend's dazzling veneer as a distinguished cancer researcher. As the trial progresses, he will question everything he thought he knew about his friend. Despite Pafko's many failings, is he innocent of the terrible charges laid against him? How far will Stern go to save his friend, and -- no matter the trial's outcome -- will he ever know the truth? Stern's duty to defend his client and his belief in the power of the judicial system both face a final, terrible test in the courtroom, where the evidence and reality are sometimes worlds apart. Full of the deep insights into the spaces where the fragility of human nature and the justice system collide, Scott Turow's *The Last Trial* is a masterful legal thriller that unfolds in page-turning suspense -- and questions how we measure a life. Experimental approaches to auditory research make use of validated animal models to determine what can be generalized from one species to another. We're With Nobody is a thrilling, eye-opening insider's view of a little-known facet of the political campaign process: the multi-million dollar opposition research industry, or "oppo" as it's called. For sixteen years authors Alan Huffman and Michael Rejebian have been digging up dirt on political candidates across the country, from presidential appointees to local school board hopefuls. We're With Nobody is a fascinating, riveting, sometimes funny, sometimes shocking look at the unseen side of political campaigning—a remarkable chronicle of a year in the life of two guys on a dedicated hunt to uncover the buried truths that every American voter has a right to know. Despite the Modernist search for new and innovative aesthetics and rejection of traditional tonality, several twentieth century composers have found their own voice while steadfastly relying on the aesthetics and techniques of Romanticism and 19th century composition principles. Musicological and reference texts have regarded these composers as isolated exceptions to modern thoughts of composition—exceptions of little importance, treated simplistically and superficially. Music critic and scholar Walter Simmons, however, believes these composers and their works should be taken seriously. They are worthy of more scholarly consideration, and deserve proper analysis, assessment, and discussion in their own regard. In *Voices in the Wilderness*, the first in a series of books celebrating the "Twentieth-Century Traditionalist," Simmons looks at six Neo-Romantic composers: Ernest Bloch Howard Hanson Vittorio Giannini Paul Creston Samuel Barber Nicolas Flagello Through biographical overviews and a comprehensive assessment of musical works, Simmons provides readers with a clear understanding of the significance of the composers, their bodies of work, and their placement in musicological history. The chapters delve deeply and objectively into each composer's oeuvre, addressing their origins, stylistic traits and consistencies, phases of development, strengths and weaknesses, and affinities with other composers. The composers' most representative works are identified, and each chapter concludes with a discography of essential recordings. Visit the author's website to read samples from the book and to listen to representative excerpts of each composer's work.

President Clinton recently directed the National Economic Council, in consultation with executive branch agencies, to analyze the economic implications of the Internet and electronic commerce domestically and internationally, and to consider new types of data collection and research that could be undertaken by public and private organizations. This book contains work presented at a conference held by executive

branch agencies in May 1999 at the Department of Commerce. The goals of the conference were to assess current research on the digital economy, to engage the private sector in developing the research that informs investment and policy decisions, and to promote better understanding of the growth and socioeconomic implications of information technology and electronic commerce. Aspects of the digital economy addressed include macroeconomic assessment, organizational change, small business, access, market structure and competition, and employment and the workforce.

In 1909, Edward Payson Weston walked from New York to San Francisco, covering around 40 miles a day and greeted by wildly cheering audiences in every city. The *New York Times* called it the "first bona-fide walk . . . across the American continent," and eagerly chronicled a journey in which Weston was beset by fatigue, mosquitos, vicious headwinds, and brutal heat. He was 70 years old. Using the framework of Weston's fascinating and surprising story, journalist Wayne Curtis investigates exactly what we lost when we turned away from foot travel, and what we could potentially regain with America's new embrace of pedestrianism. From how our brains and legs evolved to accommodate our ancient traveling needs to the way that American cities have been designed to cater to cars and discourage pedestrians, Curtis guides readers through an engaging, intelligent exploration of how something as simple as the way we get from one place to another continues to shape our health, our environment, and even our national identity. Not walking, he argues, may be one of the most radical things humans have ever done. **SHORTLISTED FOR THE ERNEST J. GAINES AWARD FOR LITERARY EXCELLENCE** "With this splendid debut, Steven Wright announces his arrival as a major new voice in the world of political thrillers. I enjoyed it immensely." —John Grisham A blistering and thrilling debut—a biting exploration of American politics, set in a small South Carolina town, about a political operative running a dark money campaign for his corporate clients Dre Ross has one more shot. Despite being a successful political consultant, his aggressive tactics have put him on thin ice with his boss, Mrs. Fitz, who plucked him from juvenile

incarceration and mentored his career. She exiles him to the backwoods of South Carolina with \$250,000 of dark money to introduce a ballot initiative on behalf of a mining company. The goal: to manipulate the locals into voting to sell their pristine public land to the highest bidder. Dre arrives in God-fearing, flag-waving Carthage County, with only Mrs. Fitz's well-meaning yet naïve grandson Brendan as his team. Dre, an African-American outsider, can't be the one to collect the signatures needed to get on the ballot. So he hires a blue-collar couple, Tyler Lee and his pious wife, Chalene, to act as the initiative's public face. Under Dre's cynical direction, a land grab is disguised as a righteous fight for faith and liberty. As lines are crossed and lives ruined, Dre's increasingly cutthroat campaign threatens the very soul of Carthage County and perhaps the last remnants of his own humanity. A piercing portrait of our fragile democracy and one man's unraveling, *The Coyotes of Carthage* paints a disturbingly real portrait of the American experiment in action.
