***Most visitors to Algonquin Provincial Park experience its beauty during the summer months. This book shows readers the diversity of wildlife and striking landscapes that appear throughout fall, winter, and spring. Images and text together create a compellingly beautiful portrait of Algonquin Park, capturing the wildlife, forests, lakes, plants, flowers, and even mushrooms that illustrate the incredible diversity of the park through all seasons. Talented painters, illustrators, and photographers Jan and Martin Rinik have spent years creating the rich range of visuals contained in this book. More than 200 colour illustrations grace these pages, along with 125 photographs of the park in all four seasons. With training as a biologist, Martin Rinik contributes authoritative information on the many species found in the park. The result is a stunning and informative portrait one of the most diverse natural habitats in the world. This book is a printed edition of the Special Issue "Snake Venom Metalloproteinases" that was published in Toxins The Dodge Viper has quickly joined the ranks of iconic American sports cars alongside the Corvette and Mustang. In this revision of his bestselling ECS title, "Motor Trends Matt Stone traces the Viper story from its conception and path to production, through to the newest Viper, the SRT-10. New photography sheds light on the Viper's impressive racing history and model evolution. The 5-Minute Clinical Consult, 2011 provides rapid-access information on the diagnosis, treatment, and follow-up of over 900 medical conditions. This best-selling clinical content is accessible online with the enhanced, quarterly-updated site or on your mobile device, to ensure instant point-of-care access to information in whichever format best suits your needs. The content has been updated to include 20 new topics, more evidence-based medicine ratings, expanded clinical pearls and patient education sections, additional complementary and alternative medicine material, and updated ICD-9 codes highlighted***

***within the text. The online content has been enhanced and now contains a better and faster search functionality providing answers in 30 seconds or less. It continues to have fully searchable content of the book with links to PubMed, plus additional topics not covered in the print book. The online content also has over 1,000 English and Spanish patient handouts from AAFP; full-color images; videos of medical procedures and physical therapy; a new dermatology library; drug databases from Facts & Comparisons including monographs, images, interactions and updates; and laboratory information from the new edition of Wallach's Interpretation of Diagnostic Tests. This content is updated quarterly with new topics, medical procedure videos, more diagnostic images, drugs, and more. You can access all your 5-Minute Consult content using any web enabled mobile device, including Blackberry, Windows Mobile, Android, Palm, Windows PC, iPhone, or iPod Touch. Begin integrating the 5-Minute content into your daily workflow today. Interest and information in the field of medical toxicology has grown rapidly, but there has never been a concise, authoritative reference focused on the subjects of natural substances, chemical and physical toxins, drugs of abuse, and pharmaceutical overdoses. Medical Toxicology of Natural Substances finally gives you an easily accessible resource for vital toxicological information on foods, plants, and animals in key areas in the natural environment. This book equips readers to handle complex multi-view data representation, centered around several major visual applications, sharing many tips and insights through a unified learning framework. This framework is able to model most existing multi-view learning and domain adaptation, enriching readers' understanding from their similarity, and differences based on data organization and problem settings, as well as the research goal. A comprehensive review exhaustively provides the key recent research on multi-view data analysis, i.e., multi-view***

***clustering, multi-view classification, zero-shot learning, and domain adaption. More practical challenges in multi-view data analysis are discussed including incomplete, unbalanced and large-scale multi-view learning. Learning Representation for Multi-View Data Analysis covers a wide range of applications in the research fields of big data, human-centered computing, pattern recognition, digital marketing, web mining, and computer vision. This three volume set, CCIS 771, 772, 773, constitutes the refereed proceedings of the CCF Chinese Conference on Computer Vision, CCCV 2017, held in Tianjin, China, in October 2017. The total of 174 revised full papers presented in three volumes were carefully reviewed and selected from 465 submissions. The papers are organized in the following topical sections: biological vision inspired visual method; biomedical image analysis; computer vision applications; deep neural network; face and posture analysis; image and video retrieval; image color and texture; image composition; image quality assessment and analysis; image restoration; image segmentation and classification; image-based modeling; object detection and classification; object identification; photography and video; robot vision; shape representation and matching; statistical methods and learning; video analysis and event recognition; visual salient detection. Thrombohemostatic disorder is a common haematological problem. This book focuses on the "thrombohemostatic disorder" in several aspects including summative data from the molecular to the population scales, as well as additional metanalysis for important topics. The Heart and Toxins brings together global experts to provide the latest information and clinical trials that make the connection between genetic susceptibility, gene expression, and environmental factors in cardiovascular diseases. This unique reference, edited by renowned cardiologist Meenakshi Sundaram Ramachandran, solves the problem of managing multiple clinical cases of cardiovascular toxicity. It allows connections to be made***

***between research, diagnosis, and treatment to avoid higher morbidity and mortality rates as a result of cardiovascular toxicity. Structured to bring together exploration into the epidemiology, molecular mechanism, pathogenesis, environmental factors and management in cardiovascular toxins” Included various topics on cardiovascular toxins such as plant, chemical, animal, nanomaterial and marine biology induced cardiac damage - which are new ideas discussed in detail Comprehensive chapters on the cardiovascular toxicity from drugs, radiotherapy and radiological imaging Enables you to manage multiple clinical cases of cardiovascular toxicity Outlined conclusions at the end of each chapter providing “key learning points” to help you organize the chapter’s details without losing insight The three volume set LNCS 7583, 7584 and 7585 comprises the Workshops and Demonstrations which took place in connection with the European Conference on Computer Vision, ECCV 2012, held in Firenze, Italy, in October 2012. The total of 179 workshop papers and 23 demonstration papers was carefully reviewed and selected for inclusion in the proceedings. They were held at workshops with the following themes: non-rigid shape analysis and deformable image alignment; visual analysis and geo-localization of large-scale imagery; Web-scale vision and social media; video event categorization, tagging and retrieval; re-identification; biological and computer vision interfaces; where computer vision meets art; consumer depth cameras for computer vision; unsolved problems in optical flow and stereo estimation; what's in a face?; color and photometry in computer vision; computer vision in vehicle technology: from earth to mars; parts and attributes; analysis and retrieval of tracked events and motion in imagery streams; action recognition and pose estimation in still images; higher-order models and global constraints in computer vision; information fusion in computer vision for concept recognition; 2.5D sensing technologies in motion: the***

**quest for 3D; benchmarking facial image analysis technologies. The two-volume set CCIS 662 and CCIS 663 constitutes the refereed proceedings of the 7th Chinese Conference on Pattern Recognition, CCPR 2016, held in Chengdu, China, in November 2016. The 121 revised papers presented in two volumes were carefully reviewed and selected from 199 submissions. The papers are organized in topical sections on robotics; computer vision; basic theory of pattern recognition; image and video processing; speech and language; emotion recognition. PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology. The two-volume set LNCS 10484 and 10485 constitutes the refereed proceedings of the 19th International Conference on Image Analysis and Processing, ICIAP 2017, held in Catania, Italy, in September 2017. The 138 papers presented were carefully reviewed and selected from 229 submissions. The papers cover both classic and the most recent trends in image processing, computer vision, and pattern recognition, addressing both theoretical and applicative aspects. They are organized in the following topical sections: video analysis and understanding; pattern recognition and machine learning; multiview geometry and 3D computer vision; image analysis, detection and recognition; multimedia; biomedical and assistive technology; information forensics and security; imaging for cultural heritage and archaeology; and imaging solutions for improving the quality of life. The 5-Minute Clinical Consult 2014 Standard Edition provides rapid-access in a quick-reference format. It delivers diagnosis, treatment, medications, follow-up, and associated factors for a broad range of diseases and conditions. Organized alphabetically by diagnosis, this best-selling clinical reference continues to present brief, bulleted information on disease topics in a**

***consistent and reader-friendly three-column format. Helping teachers move beyond fluency as measured by speed alone, this book focuses on building the skills that students need to read accurately, meaningfully, and expressively--the essential components of reading comprehension. Each concise chapter presents a tried-and-true instructional or assessment strategy and shows how K-12 teachers can apply it in their own classrooms, using a wide variety of engaging texts. Special features include classroom examples, "Your Turn" activities, and 24 reproducible forms, in a large-size format for easy photocopying. Purchasers also get access to a Web page where they can download and print the reproducible materials. Graduate level account of hardware verification and algebraic specification. A decade after publication of the first edition, Handbook of Venoms and Toxins of Reptiles responds to extensive changes in the field of toxinology to endure as the most comprehensive review of reptile venoms on the market. The six sections of this new edition, which has nearly doubled in size, complement the original handbook by presenting current information from many of the leading researchers and physicians in toxinology, with topics ranging from functional morphology, evolution and ecology to crystallography, -omics technologies, drug discovery and more. With the recent recognition by the World Health Organization of snakebite as a neglected tropical disease, the section on snakebite has been expanded and includes several chapters dealing with the problem broadly and with new technologies and the promises these new approaches may hold to counter the deleterious effects of envenomation. This greatly expanded handbook offers a unique resource for biologists, biochemists, toxicologists, physicians, clinicians, and epidemiologists, as well as informed laypersons interested in the biology of venomous reptiles, the biochemistry and molecular biology of venoms, and the effects and treatment of human envenomation. ***is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology. This book presents the refereed proceedings of the third International Conference on Advanced Machine Learning Technologies and Applications, AMLTA 2018, held in Cairo, Egypt, on February 22-24, 2018, and organized by the Scientific Research Group in Egypt (SRGE). The papers cover current research in machine learning, big data, Internet of Things, biomedical engineering, fuzzy logic, security, and intelligence swarms and optimization. This book constitutes the refereed proceedings of the 17 International Conference on Intelligent Data Engineering and Automated Learning, IDEAL 2016, held in Yangzhou, China, in October 2016. The 68 full papers presented were carefully reviewed and selected from 115 submissions. They provide a valuable and timely sample of latest research outcomes in data engineering and automated learning ranging from methodologies, frameworks, and techniques to applications including various topics such as evolutionary algorithms; deep learning; neural networks; probabilistic modeling; particle swarm intelligence; big data analysis; applications in regression, classification, clustering, medical and biological modeling and predication; text processing and image analysis. The first book of its kind dedicated to the challenge of person re-identification, this text provides an in-depth, multidisciplinary discussion of recent developments and state-of-the-art methods. Features: introduces examples of robust feature representations, reviews salient feature weighting and selection mechanisms and examines the benefits of semantic attributes; describes how to segregate meaningful body parts from background clutter; examines the use of 3D depth images and contextual constraints derived from the visual appearance of a group; reviews approaches to***

***feature transfer function and distance metric learning and discusses potential solutions to issues of data scalability and identity inference; investigates the limitations of existing benchmark datasets, presents strategies for camera topology inference and describes techniques for improving post-rank search efficiency; explores the design rationale and implementation considerations of building a practical re-identification system.***
