Japan and Christianity Aug 19 2019 Much has been written of the 'success' of the early missions to Japan during the decades immediately following the arrival of the first Jesuits in 1549. The subsequent 'failure' of the faith to put down roots strong enough to survive this initial wave of enthusiasm is discussed with equal alacrity. The papers in this volume, born of a Conference

marking the centenary of the Japan Society of London, represent an attempt to reassess the contact between Christianity and Japan in terms of a symbiotic relationship, a dialogue in which the impact of Japan on the imported religion is viewed alongside the more frequently cited influence of Christianity on Japanese society. Here is a dynamic cultural encounter, examined by the papers in this volume from a series of political, literary and historical perspectives.

The book also investigates how Japan's and Korea's political and diplomatic ideologies emerged as a nascent form of nationalism which scholars have not previously clarified.

Mountaineering Tourism Jan 04 2021 This book offers a critical account of the historical evolution of mountaineering and its relation to the phenomenon of tourism, providing an overview of recent developments linked to the diversification, commodification and commercialisation of

mountaineering activity. Mountaineering, broadly defined as hiking, trekking and climbing, is now a mass phenomenon, with continually growing numbers of trekkers, climbers and religious tourists hiking in mountain regions. Increasing visitor numbers require the current policies to be updated. The environments around high-mountain areas and their local resident communities, until recently cut off from civilisation, are sensitive to outside influences and have been abruptly exposed to the impact of mountaineering and related activities. This is the first book to disentangle overlapping terms and definitions related to mountaineering tourism. It identifies the key terms and turning points in mountaineering tourism and discusses the impacts of mountaineering tourism from an environmental, socio-cultural and personal perspective and identifies current tourism management policies. Finally, this book provides a continuum between the past and future of mountaineering tourism and aims to provide policy suggestions for sustainable management of fragile mountain regions. This will be of great interest to upper-level students and academics of tourism, as well as industry representatives and policymakers with an interest in adventure tourism and mountaineering.

Machine Tools for High Performance Machining May 08 2021 Machine tools are the main production factor for many industrial applications in many important sectors. Recent developments in new motion devices and numerical control have led to considerable technological improvements in machine tools. The use of five-axis machining centers has also spread, resulting in reductions in set-up and lead times. As a consequence, feed rates, cutting speed and chip section increased, whilst accuracy and precision have improved as well. Additionally, new cutting tools have been developed, combining tough substrates, optimal geometries and wear resistant coatings. "Machine Tools for High Performance Machining" describes in depth several aspects of machine structures, machine

elements and control, and application. The basics, models and functions of each aspect are explained by experts from both academia and industry. Postgraduates, researchers and end users will all find this book an essential reference.

Global History and New Polycentric Approaches Feb 17 2022 This book is open access under a CC BY 4.0 license. Rethinking the ways global history is envisioned and conceptualized in diverse countries such as China, Japan, Mexico or Spain, this collection considers how global issues are connected with our local and national communities. It examines how the discipline had evolved in various historiographies, from Anglo Saxon to southern European, and its emergence in Asia with the rapid development of the Chinese economy motivation to legitimate the current uniqueness of the history and economy of the nation. It contributes to the revitalization of the field of global history in Chinese historiography, which have been dominated by national narratives and promotes a debate to open new venues in which important features such as scholarly mobility, diversity and internationalization are firmly rooted, putting aside national specificities. Dealing with new approaches on the use of empirical data by framing the proper questions and hypotheses and connecting western and eastern sources, this text opens a new forum of discussion on how global history has penetrated in western and eastern historiographies, moving the pivotal axis of analysis from national perspectives to open new venues of global history.
