It became known as the Amazon in Sweden and the 121 and 122S in export markets, the latter denoting a more sporty derivative. However, despite its substantial appearance, all Amazons were surprisingly fleet of foot - this was one of the most sporty European saloons of the 1960s. With its elegant, timeless styling the Amazon broke new ground for Volvo - and for passenger cars as a whole. This new book covers the complete story of the Volvo Amazon, from 1956 onwards, including full production histories, comprehensive specification details, and over 250 photographs. The book covers the history of Volvo before and after the Amazon, and development and production of all Amazon derivatives from 1956-1970, including the 121, 122S, 123GT and all of the estate editions. There are biographies of key Volvo personnel, including the company's first designer, Jan Wilsgaard. Also included is the Amazon in motorsport, plus driver biographies: Tom Trana, Sylvia Osterberg and Carl-Magnus Skogh. There is a full buying guide along with tips on tuning and modifying, including rally preparation, and an insight into what the press thought of each Amazon derivative, with pages also devoted to how the car was marketed in period. An ideal resource for owners, or anyone with an interest in the evolution of these classic cars, which is superbly illustrated with 250 colour photographs. 184 pages, and more than 120

illustrations and charts, size 8.25x10.75 inches. This manual is a compilation of three factory publications including the owner's instruction manual, the parts/spares manual and a set of service sheets. These publications cover all three variations of the 175cc two-stroke and the 250cc four-stroke and electric start models manufactured from 1959-1965. Neither BSA nor Triumph ever published a workshop manual for these models, however, the combination of these three publications provides the most comprehensive maintenance and repair information that was ever made available from the manufacturer. **MANUALS & TECHNICAL PUBLICATIONS:** Maintenance, repair and service information was issued under both the BSA and Triumph name. However, as the machines were identical in all aspects, any technical documentation can be applied to either manufacturer without hesitation. **SERVICE SHEETS:** Beginning in December 1959, both BSA and Triumph began publishing repair, overhaul and technical information in the form of individual (dealer only) 'Service Sheets'. It should be noted that it was never intended that these service sheets would be distributed to the general public. However, they were eventually combined into a single publication and released under both the BSA and Triumph names, the contents being identical in either case. **INSTRUCTION MANUAL:** Both BSA and Triumph published an identical 'Instruction Manual' the only difference being the name on the front cover. These publications were somewhat more detailed than typical 'owner's manuals' as they included overhaul information in addition to general maintenance and adjustments. As these instruction manuals were included with each new scooter purchased, there were a number of 'editions' published during the lifetime of the model, however, the contents remained basically unchanged. When combined with the 'Service Sheets' they are a reasonable substitute for a workshop manual. **PARTS (or) SPARES MANUAL:** The parts manuals are also identical and include exploded component diagrams that are extremely helpful in the rebuilding or restoration process. **ADDITIONAL DATA:** There is an addendum to the rear of this manual that contains a number of communications that were sent from the UK factory to their US distributors. These documents are somewhat rare and they may be of help in assisting in the maintenance of one of these machines. **DESIGN & GENERAL SPECIFICATIONS:** Designed by Edward Turner (Triumph) and sold under both BSA and Triumph brand names to take advantage of established distribution networks, this badge engineering was one of the last uses of the Sunbeam name. The differences between the BSA Sunbeam and Triumph Tigress were entirely cosmetic—the former in polychromatic green paint, also two-tone red and cream, with a BSA badge; the latter in a shell blue or mimosa and ivory (two-tone) with a Triumph badge. Introduced in late 1959, the scooter was available with a 250 cc four-stroke twin (10hp), or 175cc two-stroke single cylinder engine (7.5hp). Both engines were forced-air-cooled. The two-stroke was a development of the BSA Bantam engine but the four-stroke was a completely new parallel-twin with a gear drive to the gearbox. The contact-breaker fed two separate ignition coils, each of which connected directly to its own spark plug without the need for a distributor. Drive to the rear wheel was by a fully enclosed chain in an oil bath. Both versions had four, foot-operated gears. Some of the 250 twins were fitted with an electric starter and a 12 volt (not 6 volt) electrical system, they were identified as either B2S (Sunbeam) or TW2S (Triumph). The 250 cc four-stroke model was discontinued in 1964 and the 175cc two-stroke model in 1965. Step by step instructions with plenty of photographs, plus detailed information on 4 cylinder L, 2L, 2L-T and 3L vehicles including turbo versions from 1979 to 1997, 2WD and 4WD. In this unique blend of self-help and moral philosophy, perfect for fans of Gretchen Rubin's The Happiness Project or Dan Harris' 10% Happier, talk-radio host Dennis Prager shows us that happiness isn't just a value—it's a moral obligation. When you ask people about their most cherished values, "happiness" is always at the top of the list. In this enduring happiness manifesto, Prager examines how happiness not only makes us better people, but has an effect on the lives of everyone around us—providing them with a positive environment in which to thrive and be happy themselves. Achieving that happiness won't be easy, though: to Prager, it requires a continuing process of counting your blessings and giving up any expectations that life is supposed to be wonderful. "Can we decide to be satisfied with what we have?" he asks. "A poor man who can make himself satisfied with his portion will be happier than a wealthy man who does not allow himself to be satisfied." Prager echoes other political commentators in complaining that too many people today see themselves as victims; he submits that the only way to achieve your desires is to take responsibility for your life rather than blaming others. If you're willing to put some thought into achieving a happier outlook, you will find plenty to mull over in Happiness Is a Serious Problem.
