The 2013 collapse of Rana Plaza, an eight-story garment factory in Savar, Bangladesh, killed over a thousand workers and injured hundreds more. This disaster exposed the brutal labor conditions of the global garment industry and revealed its failures as a competitive and self-regulating industry. Over the past thirty years, corporations have widely adopted labor codes on health and safety, yet too often in their working lives, garment workers across the globe encounter death, work-related injuries, and unhealthy factory environments. Disasters such as Rana Plaza notwithstanding, garment workers

routinely work under conditions that not only escape public notice but also undermine workers' long-term physical health, mental well-being, and the very sustainability of their employment. *Unmaking the Global Sweatshop* gathers the work of leading anthropologists and ethnographers studying the global garment industry to examine the relationship between the politics of labor and initiatives to protect workers' health and safety. Contributors analyze both the labor processes required of garment workers as well as the global dynamics of outsourcing and subcontracting that produce such demands on workers' health. The accounts contained in *Unmaking the Global Sweatshop* trace the histories of labor standards for garment workers in the global South; explore recent partnerships between corporate, state, and civil society actors in pursuit of accountable corporate governance; analyze a breadth of initiatives that seek to improve workers' health standards, from ethical trade projects to human rights movements; and focus on the ways in which risk, health, and safety might be differently conceptualized and regulated. *Unmaking the Global Sweatshop* argues for an expansive understanding of garment workers' lived experiences that recognizes the politics of labor, human rights, the privatization and individualization of health-related responsibilities as well as the complexity of health and well-being. Contributors: Mark Anner, Hasan Ashraf, Jennifer Bair, Jeremy Blasi, Geert De Neve, Saydia Gulrukh, Ingrid Hagen-Keith, Sandya Hewamanne, Caitrin Lynch, Alessandra Mezzadri, Patrick Neveling, Florence Palpacuer, Rebecca Prentice, Kanchana N. Ruwanpura, Nazneen Shifa, Dina M. Siddiqi, Mahmudul H. Sumon. This book constitutes the proceedings of the 6th International Symposium on Model-Based Safety and Assessment, IMBSA 2019, held in Thessaloniki, Greece, in October 2019. The 24 revised full papers presented were carefully reviewed and selected from 46 initial submissions. The papers are organized in topical sections on safety models and languages; dependability analysis process; safety assessment; safety assessment in automotive industry; AI in safety assessment. *Policing the Factory* describes the operation of the Bank of England police, the Post Office police, and various other private policing agencies, employed to track down and prosecute workplace offenders. The authors focus in particular on the Worsted Committee and their Inspectors, who, between 1777 and 1968, prosecuted thousands of workers in the north of England for taking home workplace scraps, or wasting their employer's time. Most of the workers prosecuted spent a month in prison upon conviction, and many more were dismissed from employment without any formal legal action taking place. This book explores how, and under what legislative basis, the criminal law could be brought into private spaces in this period and goes on to suggest that the activities of the Inspectorate inhibited the development of public policing in Yorkshire. The book presents case studies, newspaper comment, memoirs, and statistics based on detailed archival analysis of court records, to create a richly textured story which will inform and challenge contemporary debates on policing and police history. Hundreds of Schematics and Diagrams to Help You Troubleshoot and Repair Your Vehicle! This book argues that larger flaws in the global supply chain must first be addressed to change the way business is conducted to prevent factory owners from taking deadly risks to meet clients' demands in the garment industry in Bangladesh. Using the 2013 Rana Plaza disaster as a departure point, and to prevent such tragedies from occurring in the future, this book presents an interdisciplinary analysis to address the disaster which resulted in a radical change in the functioning of the garment industry. The chapters present innovative ways of thinking about solutions that go beyond third-party monitoring. They open up possibilities for a renewed engagement of international brands and buyers within the garment sector, a focus on direct worker empowerment using technology, the role of community-based movements, developing a model of change through enforceable contracts combined with workers movements, and a more productive and influential role for both factory owners and the government. This book makes key interventions and rethinks the approaches that have been taken until now and proposes suggestions for the way forward. It engages with international brands, the private sector, and civil society to strategize about the future of the industry and for those who depend on it for their livelihood. A much-needed review and evaluation of the many initiatives that have been set up in Bangladesh in the wake of Rana Plaza, this book is a valuable addition to academics in the fields of development studies, gender and women's studies, human rights, poverty and practice, political science, economics, sociology, anthropology, and South Asian studies. Just as the Beetle started a long tradition of Volkswagen automotive excellence, these are the manuals that created the Bentley reputation for clarity, thoroughness, and indispensability. Correll (Life Treatment Center) "This book describes the way alcoholics actually think better than anything I have ever read." The world of the good old-timers of the early Alcoholics Anonymous movement comes alive in this book. It tells the interlocking stories of seven people from diverse backgrounds--men, women, black, white, wealthy, poor--who lived and taught the A.A. program with such clarity and spiritual depth, that people came from miles away to sit at their feet and be taught

by them. This account was originally written for the local intergroups, to tell how A.A. began during the 1940's and 50's in the cities and towns along the St. Joseph river, as it wound its way through Indiana and Michigan to empty into the Great Lakes. But then all across the country, people struggling with alcoholism and addiction began asking for copies, and psychotherapists and counselors too. It spoke to the heart, they said. It made the twelve step program come alive and showed how it really worked. And above all, they reported, they had found that the words of these men and women were filled with a kind of spiritual wisdom and deep compassion which had the power to heal the soul. So this new edition of The Factory Owner & the Convict has now been prepared, with the last half now printed as a separate volume entitled The St. Louis Gambler & the Railroad Man.
