linear inequalities examples and practice problems mechamath Jul 03 2020 web for example

$3x + 6 > 3x + 6$ and $2x + 2 < 2x + 2$ are inequalities to solve. To solve inequalities, we can follow the following steps:
step 1: we simplify the inequality if possible. This includes removing grouping signs such as parentheses, combining like terms, and removing fractions.
step 2: solve for the variable.
[practice problems introduction to algorithms electrical](#) Nov 26 2019 web practice problems optional problem sessions were held to work through example problems with the instructors.
