**The Strands of Speech and Language Therapy Sep 19  
2019 This book is written by a team of speech and  
language therapists from The Wolfson  
Neurorehabilitation Centre. It is intended for  
practitioners working with patients who have acquired  
communication disorders resulting from brain injury:  
aphasia, cognitive-communication disorder, dysarthria,  
apraxia. The authors believe that a therapeutic  
programme should have it's foundations in the  
linguistic, non-verbal, neurological and  
neuropsychological perspective of the patient's  
difficulties. The approach the team has developed  
consists of several different strands of therapy, with  
each strand representing an element of the  
rehabilitation process: assessment; goal planning;  
specific individualised treatment; education; friends  
and family; and psychosocial adjustment. This book  
describes these strands, illustrates in a user-friendly  
way how each one relates to therapy, and gives some**

**practical ideas of how practitioners might work within them. Each chapter begins with the guiding principles and evidence bases that underlie the rationale for one particular strand of therapy. They then follow examples of practice and case studies of a real-life example of each strand. This book describes a speech and language therapy service that aims to be responsive to patients' needs and develops tailor-made intervention programmes that are unique to each individual. It includes CD containing assessments and practical tools.**

**Pragmatics in Speech and Language Pathology Aug 11 2021** The selected contributions in this volume bring together applications of pragmatics in speech and language pathology, as well as discussions of the applicability of different theoretical strands of the study of human linguistic interaction and its cognitive bases to the field of communication disorders. The authors address practical issues in the classification, assessment and treatment of pragmatic disorders both in developmental and acquired contexts. Further major concerns are the theoretical foundations of clinical pragmatics (such as linguistic pragmatics, functional approaches to language analysis, and cognitive science), and the development of clinical pragmatics.

**Critical Perspectives on Social Justice in Speech-Language Pathology Oct 21 2019 There is very little discussion of socially just approaches to speech-language pathology. Within other fields of clinically-oriented practice, social justice is a topic that has received a great deal of attention within the last few years. Pedagogy for addressing social justice has been developed in other disciplines. The field of communication disorders has failed to move forward and do the same. Discussion of social justice is important given the current sociopolitical climate and landscape that clients carry out in their day-to-day functioning. Speech-language pathologists (SLPs) have an opportunity to engage in practices that help address and alleviate some of the injustices that contribute to educational and health disparities experienced by communities of color. They may do this through the development and application of a socially just orientation of culturally competent practice that fosters changes beyond the individual level. Adapting such a framework makes it possible for SLPs to effectively advocate for and foster equity and inclusion**

**for the individuals and broader communities impacted by SLP services. *Critical Perspectives on Social Justice in Speech-Language Pathology* addresses the socio-political contexts of how the field of speech-language pathology and service delivery can impact policy and debates related to social justice issues. It covers topic areas including disproportionality in special education, disability rights and ableism, achievement and opportunity gaps, health disparities, and LGBTQ+ rights with a focus on voice, communication, and gender-diverse populations. This book is essential for speech-language pathologists, administrators, practitioners, researchers, academicians, and students interested in how the SLP profession and discipline can contribute to or develop efforts to help address injustices faced by Black, Indigenous, and people of color (BIPOC) communities.**
