Part of a series on expert systems around the world. Operational Expert System Applications in the Far East covers various aspects of expert system applications in the Far East. Some of the industries this book reports on include: Steel, electro-mechanical, power, automobile, oil, paper, airline and diagnosis. A memoir-in-essays from disability advocate and creator of the Instagram account @sitting\_pretty Rebekah Taussig, processing a lifetime of memories to paint a beautiful, nuanced portrait of a body that looks and moves differently than most. Growing up as a paralyzed girl during the 90s and early 2000s, Rebekah Taussig only saw disability depicted as something monstrous (The Hunchback of Notre Dame), inspirational (Helen Keller), or angelic (Forrest Gump). None of this felt right; and as she got older, she longed for more stories that allowed disability to be complex and ordinary, uncomfortable and fine, painful and fulfilling. Writing about the rhythms and textures of what it means to live in a body that doesn't fit, Rebekah reflects on everything from the complications of kindness and charity, living both independently and dependently, experiencing intimacy, and how the pervasiveness of ableism in our everyday media directly translates to everyday life. Disability affects all of us, directly or indirectly, at one point or another. By exploring this truth in poignant and lyrical essays, Taussig illustrates the need for more stories and more voices to understand the diversity of humanity. Sitting Pretty challenges us as a society to be patient and vigilant, practical and imaginative, kind and relentless, as we set to work to write an entirely different story. Developing countries that have attained the status of emerging markets offer considerable opportunities for first world businesses. However, there are challenges to successful operations in this field of enterprise. Until the catastrophic economic crisis of the late 1990s, East Asia was perceived as a monolithic success story. But heady economic growth rates masked the most divided continent in the world - one half the most extraordinary developmental success story ever seen, the other half a paper tiger. Joe Studwell explores how policies ridiculed by economists created titans in Japan, Korea and Taiwan, and are now behind the rise of China, while the best advice the West could offer sold its allies in South-East Asia down the economic river. The first book to offer an Asia-wide deconstruction of success and failure in economic development, Studwell's latest work is provocative and iconoclastic - and sobering reading for most of the world's developing countries. How Asia Works is a must-read book that packs powerful insights about the world's most misunderstood continent. Uma contribuição necessária para o entendimento da evolução da indústria automobilística global, este livro ajuda a entender como e por que a Hyundai cresceu rapidamente. Analisa a agressiva e robusta estratégia de internacionalização que levou a empresa da 15a a 4a posição no ranking mundial de produtores de automóveis em pouco mais de 10 anos. Since 1953, the Corvette has been the quintessential, and some argue only, American sports car. Corvette Black Book is the premiere resource for enthusiasts and collectors (0-933534-47-7, 2001 Edition), packing a ton of information and taking readers on a year-by-year journey through the history of Corvette production, culminating with the 2002 model-year. For each car the author includes not only VINs, but specifications for engine blocks, heads, carburetors, alternators and distributors. Also provided are each year's base model and option prices, as well as charts of color codes. In addition, there's a brief Corvette history and a photograph for every model year. By studying the work of hundreds of the most original and effective business minds, the authors present a common architecture that illuminates exceptional analysis and creative performance. 2 x 2 Thinking is characterized by a fundamental appreciation for the dynamic and complex nature of business. The best strategists go out of their way to tackle dilemmas rather than merely solve problems. They use opposition, creative tension, iteration and transcendence to get to the heart of issues and involve critical others in finding the best solutions. The authors demonstrate how to apply the 2 x 2 approach to a wide range of important business challenges. This open access book explores the historical, cultural and philosophical contexts that have made anti-poverty the core of Chinese society since Liberation in 1949, and why poverty alleviation measures evolved from the simplistic aid of the 1950s to Xi Jinping's precision poverty alleviation and its goal of eliminating absolute poverty by 2020. The book also addresses the implications of China's experience for other developing nations tackling not only poverty but such issues as pandemics, rampant urbanization and desertification exacerbated by global warming. The first of three parts draws upon interviews of rural and urban Chinese from diverse backgrounds and local and national leaders. These interviews, conducted in even the remotest areas of the country, offer candid insights into the challenges that have forced China to continually evolve its programs to resolve even the most intractable cases of poverty. The second part explores the historic, cultural and philosophical roots of old China's meritocratic government and how its ancient Chinese ethics have led to modern Chinese socialism's stance that "poverty amidst plenty is immoral". Dr. Huang Chengwei, one of China's foremost anti-poverty experts, explains the challenges faced at each stage as China's anti-poverty measures evolved over 70 years to emphasize "enablement" over "aid" and to foster bottom-up initiative and entrepreneurialism, culminating in Xi Jinping's precision poverty alleviation. The book also addresses why national economic development alone cannot reduce poverty; poverty alleviation programs must be people-centered, with measurable and accountable practices that reach even to household level, which China has done with its "First Secretary" program. The third part explores the potential for adopting China's practices in other nations, including the potential for replicating China's successes in developing countries through such measures as the Belt and Road Initiative. This book also addresses prevalent misperceptions about China's growing global presence and why other developing nations must address historic, systemic causes of poverty and inequity before they can undertake sustainable poverty alleviation measures of their own. These essays identify the evolutionary processes and patterns of learning, capability-building and innovation in catch-up countries. They suggest that such economies have different patterns of learning from those of advanced countries. Kim uses the example of Korea to examine various industries. Describes influential business philosophies and marketing ideas from the past twenty years and examines why they did not work. This second edition of Historical Dictionary of Burma (Myanmar) contains a chronology, an introduction, and an extensive bibliography. The dictionary section has over 700 cross-referenced entries on important personalities, politics, economy, foreign relations, religion, and culture. In 1962, South Korea assembled just 1,100 new automobiles. By 1996, this total had soared to 2,812,714. What explains this remarkable growth? The answer is complex, and involves a combination of a supportive State, timely technology alliances, a skilled but historically low-paid workforce, aggressive pricing, savvy entrepreneurs, and fortuitous circumstances. Despite this amazing ascent, comparatively little has been written about the Korean auto industry in English. In the first of a two-volume set, this 11-chapter book seeks to help fill this void by providing in-depth examinations of all six of Korea's automakers from their beginnings through 1996. Uniquely written from the perspective of industry analysts at the time (without knowledge of the Asian Fiscal Crisis), the book should prove informative to practitioners, scholars, and students interested in automotive history, international political economy, Asian studies, and more. A.J. Jacobs is Professor of Sociology at East Carolina University, USA. In the unstable international conditions of the post Cold War world, the role of diplomacy has taken on increasing importance with the greater complexity of relationships between international power centres. The Practice of Diplomacy tracks the historical development of diplomatic relations and methods from the earliest period up to their current transformations in the late twentieth century, showing how they have changed to encompass new technological advances and the needs of modern international environments. This coherent and accessible text brings the history of diplomacy fully up to date, exploring altered perspectives and newly emerging practices resulting from United Nations diplomacy and recent political developments in Eastern and central Europe, including the former Yugoslavia. economical driver; use readily available information to help you become a more eco-efficient driver; the pros and cons of hybrid vehicles and alternative fuels for the ordinary driver; future alternatives for powering cars - advantages and disadvantages."--Publisher's description. Offers a taste of the diverse management and economic climate in Asia by placing a magnifying glass over the economies of Asia. It first develops a framework for understanding business strategy, then provides a detailed profile of Asian countries with spotlights on their business characteristics and how that affects the implementation of strategy. Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. The challenge faced by family businesses and their stakeholders, is to recognise the issues that they face, understand how to develop strategies to address them and more importantly, to create narratives, or family stories that explain the emotional dimension of the issues to the family. The most intractable family business issues are not the business problems the organisation faces, but the emotional issues that compound them. Applying psychodynamic concepts will help to explain behaviour and will enable the family to prepare for life cycle transitions and other issues that may arise. Here is a new understanding and a broader perspective on the human dynamics of family firms with two complementary frameworks, psychodynamic and family systematic, to help make sense of family-run organisations. Although this book includes a conceptual section, it is first and foremost a practical book about the real world issues faced by business families. The book begins by demonstrating that many years of achievement through generations can be destroyed by the next, if the family fails to address the psychological issues they face. By exploring cases from famous and less well known family businesses across the world, the authors discuss entrepreneurs, the entrepreneurial family and the lifecycles of the individual and the organisation. They go on to show how companies going through change and transition can avoid the pitfalls that endanger both family and company. The authors then apply tools that will help family businesses in transition and offer their analyses and conclusions. Readers should draw their own conclusions from careful examination of the cases, identifying the problems or dilemmas faced and the options for improved business performance and family relationships. They should ask what they might have done in the given situation and what new insight into individual or family behaviour each case offers. The goal is to avoid a bitter ending. NOTE: NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT--OVERSTOCK SALE -- Significantly reduced list price This edition of North Korea: A Country Study replaces the previous edition, published in 1994. Like its predecessor, this study attempts to review the history and treat in a concise manner the dominant social, political, economic, and military aspects of contemporary North Korea. Sources of information included books, scholarly journals, foreign and domestic newspapers, official reports of governments and international organizations, and numerous periodicals and Web sites on Korean and East Asian affairs. A word of caution is necessary, however. Even though more information is forthcoming from and about North Korea since it became a member of the United Nations in 1991, the government of a closed society such as that of North Korea controls information for internal and external consumption, limiting both the scope of coverage and its dissemination. A chronology of major historical events is provided at the front of the book (see table A). Chapter bibliographies appear at the end of the book, and brief comments on some of the more valuable and enduring sources recommended for further reading appear at the end of each chapter. A glossary also is included. Spellings of place-names in the book are in most cases those approved by the U.S. Board on Geographic Names (BGN); spellings of some of the names, however, cannot be verified, as the BGN itself notes. Readers of this book are alerted that because the BGN recognizes the Sea of Japan as the formal name of the body of water to the east of the Korean Peninsula, this book also uses that term.. Similarly, the Yellow Sea is identified as the West Sea. The McCune-Reischauer system of transliteration has been employed except for the names of some prominent national and historical figures. Thus, Kim Il-sung is rendered as Kim Il Sung, and Kim Chong-il is rendered as Kim Jong Il. The names of Korean authors writing in English are spelled as given in the original publication. Measurements are given in the metric system. A conversion table (see table B) is provided to assist readers who are unfamiliar with metric measurements.
