Routledge Handbook of Chinese Medicine Nov 24 2019 The Routledge Handbook of Chinese Medicine is an extensive,

interdisciplinary guide to the nature of traditional medicine and healing in the Chinese cultural region, and its plural epistemologies. Established experts and the next generation of scholars interpret the ways in which Chinese medicine has been understood and portrayed from the beginning of the empire (third century BCE) to the globalisation of Chinese products and practices in the present day, taking in subjects from ancient medical writings to therapeutic movement, to talismans for healing and traditional medicines that have inspired global solutions to contemporary epidemics. The volume is divided into seven parts: Longue Durée and Formation of Institutions and Traditions Sicknes and Healing Food and Sex Spiritual and Orthodox Religious Practices The World of Sinographic Medicine Wider Diasporas Negotiating Modernity This handbook therefore introduces the broad range of ideas and techniques that comprise pre-modern medicine in China, and the historiographical and ethnographic approaches that have illuminated them. It will prove a useful resource to students and scholars of Chinese studies, and the history of medicine and anthropology. It will also be of interest to practitioners, patients and specialists wishing to refresh their knowledge with the latest developments in the field. Books and Social Media Sep 15 2021 Social media and digital technologies are transforming what and how we read. Books and Social Media considers the way in which readers and writers come together in digital communities

to discover and create new works of fiction. This new way of engaging with fiction stretches the boundaries of what has been considered a book in the past by moving beyond the physical or even digitally bound object to the consideration of content, containers, and the ability to share. Using empirical data and up-to-date research methods, Miriam Johnson introduces the ways in which digitally social platforms give rise to a new type of citizen author who chooses to sidestep the industry's gatekeepers and share their works directly with interested readers on social platforms. Gender and genre, especially, play a key role in developing the communities in which these authors write. The use of surveys, interviews, and data mining brings to the fore issues of gender, genre, community, and power, which highlight the push and pull between these writers and the industry. Questioning what we always thought we knew about what makes a book and traditional publishing channels, this book will be of interest to anyone studying or researching publishing, book history, print cultures, and digital and contemporary literatures.

The Conduct of War in the 21st Century Feb 08 2021 This book examines the key dimensions of 21st century war, and shows that orthodox thinking about war, particularly what it is and how it is fought, needs to be updated.

Accelerating societal, economic, political and technological change affects how we prepare, equip and organise for war, as well as how we conduct war – both in its low-tech and high-tech forms, and whether it is with high intensity or low intensity. The volume examines changes in warfare by investigating the key features of the conduct of war during the first decades of the 21st century. Conceptually centred around the terms 'kinetic', 'connected' and 'synthetic', the analysis delves into a wide range of topics. The contributions discuss hybrid warfare, cyber and influence activities, machine learning and artificial intelligence, the use of armed drones and air power, the implications of the counterinsurgency experiences in Iraq, Afghanistan and Syria, as well as the consequences for law(fare) and decision making. This work will be of much interest to students of military and strategic studies, security studies and International Relations. Chapters 1, 2, 5, and 19 of this book are freely available as a downloadable Open Access PDF under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license available at <https://www.routledge.com/The-Conduct-of-War-in-the-21st-Century-Kinetic-Connected-and-Synthetic/Johnson-Kitzen-Sweijts/p/book/9780367515249>
