Department of Homeland Security Appropriations for Fiscal Year 2005 Jun 12 2021

Coast Guard Sep 15 2021 The Deepwater Program includes efforts to build or modernize ships and aircraft and to procure other capabilities. After a series of project failures, the Coast Guard announced in 2007 that it was taking over the systems integrator role from Integrated Coast Guard Systems (ICGS). At the same time, a \$24.2 billion program baseline was established which included schedule and performance parameters at an overall system level. This report assessed: (1) DHS and Coast Guard acquisition policies and approach to managing the program; (2) whether the program is meeting the 2007 baseline; and (3) Coast Guard efforts to manage and build its acquisition workforce. Includes recommendations. Charts and tables.

Uh-60 Black Hawk Pilot's Flight Operating Manual Dec 30 2022 Developed to replace the UH-1 Iroquis, Sikorsky's UH-60 Black Hawk first entered service in 1979. A four-blade, twin-engine, medium-lift utility helicopter, the UH-60 serves as the U.S. Army's primary tactical transport helicopter. Modified versions include models for the U.S. Navy and Air Force, and specialized versions including the UH-60C (modified for Command and Control missions), EH-60A (electronic systems operations and electronic warfare), and the UH-60Q (medical transport). Two major variants of the Black Hawk currently exist: the UH-60L and UH-60M. The UH-60L incorporates improvements to the basic design that provide more power and lifting capability, as well as automatic flight control. The newer UH-60M features upgraded engines, improved rotor blades, and state-of-the-art flight controls that will allow the helicopter's service life to extend to 2020 and beyond. Over 2500 Black Hawks have been built, and nearly 1000 more are currently on order. Black Hawks have seen combat service for the U.S. Military in Grenada, Panama, Somalia, Afghanistan and Iraq. Other nations also employ the UH-60 including Brazil, Colombia, Israel, Mexico, Taiwan, Australia, Japan, and Turkey. Created by Sikorsky and the U.S. Army, this pilot's flight operating

manual profiles the UH-60Q Black Hawk. Over 500 pages long, this unclassified document is reprinted here in its entirety."

All for One Jul 25 2022 The official United States Air Force report is called "Rescue at Ban Phanop." But, to the hundreds of men who flew on this mission, it is simply known as "Boxer 22." It was the largest search and rescue (SAR) mission in the Vietnam War that resulted in a survivor being rescued by a USAF helicopter. The recovery area was on the Ho Chi Minh Trail near the small village of Ban Phanop. For 3 days hundreds of airplanes fought to protect and rescue two pilots. Hundreds of NVA troops were equally determined to prevent the rescue. The resulting heroics by the air rescue force against seemingly impossible odds are legends that are still told at USAF fighter squadrons around the world. Read to what extremes your Air Force went to rescue "Just One Man".
