*Evaporating Genres* Jun 12 2021 In this wide-ranging series of essays, an award-winning science fiction critic explores how the related genres of science fiction, fantasy, and horror evolve, merge, and finally "evaporate" into new and more dynamic forms. Beginning with a discussion of how literary readers "unlearned" how to read the fantastic during the heyday of realistic fiction, Gary K. Wolfe goes on to show how the fantastic reasserted itself in popular genre literature, and how these genres themselves grew increasingly unstable in terms of both narrative form and the worlds they portray. More detailed discussions of how specific contemporary writers have promoted this evolution are followed by a final essay examining how the competing discourses have led toward an emerging synthesis of critical approaches and vocabularies. The essays cover a vast range of authors and texts, and include substantial discussions of very current fiction published within the last few years.

Scots: Studies in its Literature and Language May 31 2020 The skillful use of the Scots language has long been a distinguishing feature of the literatures of Scotland. The essays in this volume make a major contribution to our understanding of the Scots language, past and present, and its written dissemination in poetry, fiction and drama, and in non-literary texts, such as personal letters. They cover aspects of the development of a national literature in the Scots language, and they also give due weight to its international dimension by focusing on translations into Scots from languages as diverse as Greek, Latin and Chinese, and by considering the spread of written Scots to Northern Ireland, the United States of America and Australia. Many of the essays respond to and extend the scholarship of J. Derrick McClure, whose considerable impact on Scottish literary and linguistic studies is surveyed and assessed in this volume.
