Life is full of difficult questions, but when we have questions, the Bible has answers. In *God's Answers to Life's Difficult Questions*, Rick Warren, pastor and New York Times bestselling author, invites us to take a closer look at key biblical figures and the ways in which they walked through the challenges they faced in their daily lives. Rick Warren uses stories from scripture to teach us that the Bible is filled with examples of real people who faced the same dilemmas we're facing today. By demonstrating the ways in which God chooses to use ordinary people to accomplish his plans--despite their weaknesses and failures--Warren gives us hope as we take on life's countless challenges. Better yet, Warren provides us with realistic solutions that we can start putting into practice today. Warren takes us inside the lives of biblical characters including Moses, Paul, and Jesus himself, giving you a chance to see the up-close-and-personal ways that they navigated their own circumstances. Although *God's Answers to Life's Difficult Questions* is anchored in timeless stories from Scripture, Warren also weaves in modern examples that address the twelve questions he's asked the most as a spiritual leader, including: How can I learn to handle discouragement? How can I respond better in a crisis? How do I become more resilient when I feel like a failure? How can I fight my loneliness? How is change possible for me? How can I lead a more

peaceful life? The concrete, practical insights that Warren shares in *God's Answers to Life's Difficult Questions* will give you the tools you need to build up your resilience, strengthen your relationship with God, and finally enjoy a life full of lasting purpose, peace, and significance today. This new book, from internationally renowned education scholar Pasi Sahlberg and his colleagues, focuses on some of the most controversial issues in contemporary education reform around the world. The authors devote a chapter to each of these "hard questions": Does parental choice improve education systems? Is there a future for teacher unions? What is the right answer to the standardized testing question? Can schools prepare children for the 21st-century workplace? Will technology save schools? Can anyone be a teacher? Should higher education be for the public good? What knowledge and skills should an educator have? Each educational change question sheds much-needed light on today's large-scale education policies and related reforms around the world. The authors focus on what makes each question globally significant, what we know from international research, and what can be inferred from benchmark evidence. The final chapter offers a model for policymakers with implications for teaching, learning, and schooling overall. "This is an impressive and engaging book. If you care about the impacts of technology, testing, and teacher education designs, then this book will stretch your thinking and challenge your assumptions." —Andy Hargreaves, Boston College "Fascinating case studies open up our imaginations and provide clues for the most sustainable pathways forward for educators in the years to come." —Dennis Shirley, Boston College "Features enlightening chapters with an international perspective for educators and teacher educators alike. Highly recommended." —David C. Berliner, Arizona State University In this book, John Kekes discusses the hard questions we all must face in the course of our lives. Is there an absolute value that overrides all other considerations? Must we conform to prevailing conventions? Do we owe what our country asks of us? Must justice be done at all costs? How should we respond to evil? Should we forgive wrong actions? Does shame make life better or worse? Is it always good to be true to who we are? Do good intentions justify bad actions? Are moral values the highest of all values? There are reasonable answers to these questions, but we find that they often conflict. Their conflicts compel us to weigh the consequences of how the decisions we make affect ourselves, our relationships, and our attitude to the society in which we live. In this clearly and accessibly written book, Kekes compares and evaluates the reasons that have been given for and against answers to these hard questions by those who actually faced them. By learning from the successes and

failures of the decisions others have made, we can understand better how we should respond to the hard questions we ourselves face. We can then evaluate more reasonably the possibilities open to us and the limitations to which we are subject. This approach is an alternative to both the absolutist and the relativist ways of trying to answer hard questions. Absolutists have, for millennia, fruitlessly searched for an authoritative answer that reason requires everyone to accept. Their failure have led relativists to assume that there comes a point at which we run out of reasons and have no option but to make an arbitrary decision. Kekes instead offers a message of hope by showing that there are reasonable answers to hard questions, which are neither absolute, nor arbitrary. William Lane Craig offers answers to questions commonly asked by Christians struggling with doubt or fear, showing that the only sure foundation for hope is God Himself. The questions have come from all kinds of people in various and sundry walks of life. Some of the questions were common and not much is to be learned from answers to such generalities However, some of the questions are not only posed by the curious but come from hearts filled with consternation while contemplating the subject of Theodicy. Did the Creator contribute heavily to the world's landscape of tooth and claw? The recent financial and economic crisis has forced governments and people from around the globe to ask some hard questions about how democracy has evolved. Some of these are old questions; others are new. Is democracy really the most desirable form of government? How democratic is policy-making during the financial and economic crisis? Why do vote-seeking parties in modern democracies actually make voters miserable? Can women's under-representation in politics be explained because of voter bias? Why are some citizens still excluded from voting in their country? And can terrorist organizations that promote violence one day, really become democratic the next? This represents the first book of its kind to ask and answer a broad range of hard questions that need to be addressed in times of both flux and calls for democratic change throughout the world. It does so by bringing together leading social scientists and rising stars from around the globe. Interdisciplinary in its analysis, it is essential reading for students of comparative and international politics, political philosophy, gender studies and economics. Bernice King, the youngest daughter of Martin Luther King, Jr., and Coretta Scott King, is an ordained minister, an attorney, and one of this country's most admired speakers. As this remarkable collection of her sermons and speeches makes clear, she shares with her father a rare gift for oratory and the wisdom and compassion to inspire others. The collection begins with words designed to "disturb the comfortable." Tackling such controversial subjects as our disaffected youth, gun control, and the death penalty, King paints a compelling picture of the spiritual decay and deep-seated racism that infects our society. In the second part of the book, a selection of sermons focusing on "comforting the disturbed," King's belief in the power of faith to restore our communities, morally and spiritually, rings forth. The church, she asserts, must return to its helping and healing mission, and each of us, looking into our hearts, must put aside our differences and remember that each human life is precious. Why does God allow suffering? Why am I here? Why do I exist? Why do bad things happen? If you have questions, but are struggling to find the right answers, "Thanks for Asking" is the perfect place to start. David Levinson, Careers Adviser, The University of Edinburgh Pastors are asked lots of questions about the Christian faith—in fact, they are asked some very good questions. Like these: What convinces you that there is a God? Can God do anything? What's the difference between blind faith and reasonable faith? What's the point of praying? Can you explain God's timing? How can someone who has been really hurt extend God's grace? This book provides answers to these tough questions and many others as Dan takes a look at some of the more interesting and difficult questions that he has been asked in his many years of pastoral ministry and offers answers that are biblically sound, understandable, witty, and encouraging. You've probably asked some of these "very good questions" yourself. Teaching controversial issues in the classroom is now more urgent and fraught than ever as we face up to rising authoritarianism, racial and economic injustice, and looming environmental disaster. Despite evidence that teaching controversy is critical, educators often avoid it. How then can we prepare and support teachers to undertake this essential but difficult work? Hard Questions: Learning to Teach Controversial Issues, based on a cross-national qualitative study, examines teacher educators' efforts to prepare preservice teachers for teaching controversial issues that matter for democracy, justice, and human rights. It presents four detailed cases of teacher preparation in three politically divided societies: Northern Ireland, England, and the United States. The book traces graduate students' learning from university coursework into the classrooms where they work to put what they have learned into practice. It explores their application of pedagogical tools

and the factors that facilitated or hindered their efforts to teach controversy. The book's cross-national perspective is compelling to a broad and diverse audience, raising critical questions about teaching controversial issues and providing educators, researchers, and policymakers tools to help them fulfill this essential democratic mission of education. "Compelling reading, not only because of its intellectual rigor but also because of its honest, empathetic humanity." John C. Help students appreciate texts and write about them with conviction. Responding to a comprehension question is a surprisingly complex task. It draws on multiple skills: students must be able to read and analyze a text passage; consider what aspect of the text the question addresses; and then quickly and concisely write about their ideas, citing evidence to support them. Hence the prominence of constructed-response questions in standardized testing. In this refreshingly clear and upbeat guide, literacy consultant Nancy Boyles gives a step-by-step demonstration of how to help students achieve success with this task—and in the process of unpacking the steps involved, demonstrates how the instruction can inspire teachers' creativity as well as deepen students' literacy skills. Filled with ready-to-use scaffolds for every stage of instruction—sets of sample questions, anchor charts, cue cards, answer frames—this is a one-stop resource for teaching students how to organize their thoughts about what they've read, and then set them down in writing. The Psalmist declares in Psalm 11:3, "If the foundations are destroyed, what can the righteous do?" There has been a foundational shift in our culture from God's Word as the authority to man's. Here is a resource to help clearly and vividly demonstrate truth to those seeking to better understand and for those who have been misled by secular voices claiming to be the voice of reason. Within this book you will find mini answers to help people better understand some of these big issues. Don't have time to read a big manual?
