This proceedings book showcases the latest research work presented at the Second Edition of the Mediterranean Symposium on Smart City Application (SCAMS 2017), which was held in Tangier, Morocco on October 15–27, 2017. It presents original research results, new ideas and practical development experiences that concentrate on both theory and practice. It includes papers from all areas of Smart City Applications, e.g. Smart Mobility, Big Data, Smart Grids, Smart Homes and Buildings, clouds, crowds, mashups, social networks, and security issues. The conference stimulated cutting-edge research discussions among pioneering researchers, scientists, industrial engineers, and students from all around the world. The topics covered in this book also focus on innovative issues at the international level by bringing together experts from different countries. The scope of SCAMS 2017 included methods and practices that combine various emerging internetworking and data technologies to capture, integrate, analyze, mine, annotate, and visualize data in a meaningful and collaborative manner. A series of international workshops were organized as invited sessions during the SCAMS 2017: The 2nd International Workshop on Smart Learning & Innovative Educations The 1st International Workshop on Smart Healthcare The 1st International Workshop on Mathematics for Smart City The 1st International Workshop Industry 4.0 and Smart Manufacturing Combines photographs, line drawings, and exploded views with detailed overhaul procedures for specific units and components This How to Restore Norton Commando manual is aimed at owners and enthusiasts of the legendary Norton Commando, and covers all areas of restoration from the sourcing of the bike to its completion as a fully restored machine. Starting with advice on the different models, spares availability and where best to source a bike to restore, the book then covers the complete dismantling and restoration of the bike. Describing the engine, frame, gearbox, wheels, suspension and forks, brakes, ancillaries, bodywork, and electrics, the text is illustrated with hundreds of clear colour photos. What really sets this manual apart is the style in which it is written: not as some dull and distant workshop manual but in a friendly, humorous manner by an enthusiast of many years who is able to involve and entertain the reader, as well as providing a thorough and detailed restoration guide. This is the fourth restoration guide from an author whose previous works have been a massive hit with mechanics, enthusiasts and restorers throughout the world. Batcheller Collection. The Triumph 750 is probably the classic British motorcycle that most people will recognize, whether they are enthusiasts or not. The bike's desirability continues to grow, aided by its easy availability and excellent parts back up. Triumph Bonneville T140 is aimed at the DIY enthusiast interested in renovation and restoration, and is fully illustrated with high-quality color images, coupled with clear and concise text. Following the real life resurrection of a T140E, with all the work being carried out by the author, the book shows how to assess wear in all mechanical components, then assists in deciding the most cost effective method of dealing with it. The process is dealt with in detail giving the owner the confidence to carry out repairs to a high standard, which will be both cost effective and satisfying. Brakes, suspension, brightwork and trim are all also addressed, making this an essential purchase for all Triumph 750 owners. Completed at home by an enthusiastic DIY mechanic who has great experience rebuilding bikes, this book covers the complete restoration of a Triumph Trident T150V and a Triumph T160. Each and every aspect of the dismantling, refurbishment and reassembly of these classic bikes is covered in great detail, accompanied by a host of clear colour photos. During the twentieth century 'affluence' (both at the level of the individual household and that of society as a whole) became intimately linked with access to a range of prestige consumer durables. The Market Makers charts the inter-war origins of a process that would eventually transform these features of modern life from being 'luxuries' to 'necessities' for most British families. Peter Scott examines how producers and retailers succeeded in creating 'mass' (though not universal) market for new suites of furniture, radios, modern housing, and some electrical and gas appliances, while also exploring why some other goods, such as refrigerators, telephones, and automobiles, failed to reach the mass market in Britain before the 1950s. Creating mass markets presented a formidable challenge for manufacturers and retailers. Consumer durables required large markets. Most involved significant research and development costs. Some, such as the telephone, radio, and car, were dependent on complementary investments in infrastructure. All required intensive marketing - usually including expensive advertising in national newspapers and magazines, while some also needed mass production methods (and output volumes) to make them affordable to a mass market. This study charts the pioneering efforts of entrepreneurs (many of whom, though once household names, are now largely forgotten) to provide consumer durables at a price affordable

to a mass market and to persuade a sometimes reluctant public to embrace the new products and the consumer credit that their purchase required. In doing so, Scott shows that, contrary to much received wisdom, there was a 'consumer durables revolution' in inter-war Britain - at least for certain highly prioritised goods. The book covers the complete restoration of a 1976 KZ900, from the sourcing of the bike to its completion as a fully restored machine. Every area is covered starting with advice on the different models, spares availability, and where best to source a bike to restore. Every area of the restoration is then covered in full detail including the engine, frame, gearbox, wheels, suspension and forks, brakes, ancillaries, bodywork and electrics, accompanied by hundreds of clear color photos to illustrate the text. Additional work on a 1974 Z1A model adds complementary information. What really sets this manual apart, however, is the style in which it is written: not as some dull and distant workshop manual but in a friendly, humorous manner by an enthusiast of many

years who is able to involve and entertain the reader, as well as guiding them through the restoration process. This is the third restoration guide from Chris Rooke, whose previous works have been a massive hit with mechanics, enthusiasts and restorers throughout the world. With contributions ranging over three centuries, Culture, Capital and Representation explores how literature, cultural studies and the visual arts represent, interact with, and produce ideas about capital, whether in its early phases (the growth of stock markets) or in its late phase (global speculative capital). Well over 18,000 total pages ... Most manuals published by the Department of the Army (with updates) between 1999 and 2003.
