In *RV Buyer's Handbook*, author Walt Gerber presents a guide to help you make sense of the ins and outs of buying an RV, which may prevent you from getting a "lemon" or a "money pit." Based on his years of experience camping and working as an RV inspector,

Gerber offers a look at a host of factors to consider. He discusses the different types of RVs, reviews the array of features available, shares maintenance considerations and tips, and helps you understand the unit's many systems. From your first outing, to set up and tear down, to troubleshooting, and more RV Buyer's Handbook presents a single-source guide to help you navigate the process of choosing, equipping, and enjoying an RV. Takren starts his space-faring career as an orphan from Earth, and he quickly fell under the wing of a mentor, Drem. In the charted sections of the galaxy, Takren quickly sees firsthand the effect of Unisec, a faction in space that demands complete control and rule of the charted sections. With influences in every facet of space-based operations, Unisec is not a welcomed faction. In this very hostile and tense universe, Takren quickly learns that his goal is to simply stay alive. Nothing else matters. This first week, Takren sees firsthand what hell need to do to survive, and thanks to

Drem, Skeech, and the rest of the Rocketeers, he learns about the world he now treads in and how to live in it. Journal of composting & recycling. The book—companion to a PBS series—that proves humans are causing global warming and offers a path to the future. Since the discovery of fire, humans have been energy users and always will be. And this is a good thing—our mastery of energy is what separates us from the rest of the animal kingdom and has allowed us to be the dominant species on the planet. However, this mastery comes with a price: we are changing our environment in a profoundly negative way by heating it up. Using one engaging story after another, coupled with accessible scientific facts,

world authority Richard B. Alley explores the fascinating history of energy use by humans over the centuries, gives a doubt-destroying proof that already-high levels of carbon dioxide are causing damaging global warming, and surveys the alternative energy options that are available to exploit right now. These new energy sources might well be the engines for economic growth in the twenty-first century. In the early 1600s, Barwicke Brannon and his wife, Nicholina, gave birth to a child on a ship bound for the New World—only to see the child fall ill and its illness spread. In order to save the remaining lives onboard, the child had to be

sacrificed to the sea. Barwicke agreed, but he did not realize that as the baby drowned, so would his wife, as she threw herself overboard. So began the Brannon obsession with purity and a lack of genetic defect. Centuries later, Thomas Brannon is part of the Caltech graduating class of 1955 and has been schooled in the family history well. According to the Brannons, death is sometimes necessary to ensure the survival of the human race. Riff raff are to be disposed of, while intelligence, beauty, and health are to be revered. It is an easy sell to his intellectually advanced classmates, and together they make a plan that, in time, would rule the nation. Soon, a secret society arises—a society who uses kidnapping and rape to produce the perfect race of mankind. Now the breeding season is upon them, and years of research and surveillance are about to pay off. They will manipulate the population and the gene pool of the United States— until an escape threatens to reveal their odious plan and end a four-hundred-year fight
